

re omb control 3060-0854
truth in billing
cc dkt 98 170

whatever rules have been adopted are not doing the
job. the telephone bills are still not understandable
and need further review.

i also note that consumers are being soaked by hidden
taxes on telephone bills which are called by other
names. they constitute a tax when they are used for
telephones in libraries and get on a telephone bill.
FCC evidently feels empowered to be a taxing
superpower. this is a complaint about additional
charges being double what the basic phone service.
FCC is out of control.
